

Hernan Leon, Associate Director CRM-Factory
Beijing, China
24F Building D, The Place Tower
No. 9 Guanghua Road, Chaoyang District, 100020

November 2016

*We have collaborated with Mr. Ebert since 2010 and he has been a great help and guide to us to achieve our goals in the Microsoft NAV field;
we have successfully conducted complex projects that involved migrations, upgrades, integrations between different versions of MS Dynamics Navision and other IT systems, etc.
Besides supporting our projects we also were able to build a team of Navision developers to work together with him and his customers, providing fast pace solutions to the requirements requested, dealing as well with multi-location and multi-cultural members having English as common communication language between the different people and handling different time zones in the process, in this way Mr. Ebert was always a support of the group and also a mentor for them, not only in the technical side but also in the business scope of the projects. We hope to keep working with him in the future and be able to share a coffee since he happens to be a wonderful person as well.*
